

**64-a Konferenco de Neregistaraj Organizaĵoj,  
organizita de la Departemento pri Publika Informado (DPI)  
de Unuiĝintaj Nacioj, Bonn (Germanio), 3-5 septembro 2011**

Paĝo	Linio	Teksto	UEA - amendo
p.2	64	GENERAL STATEMENTS	--
	69-70	Recognizing that biodiversity and linguistic diversity are inseparable and alarmed at the loss of traditional knowledge caused by the loss of linguistic diversity;	Kompleta alineo aldonita laŭ amendo de UEA
p.3	92-96	Acknowledging that sustainable development as a means to ensure human well-being requires that interrelationships between population, resources, the environment and development should be fully understood, recognized, appropriately managed and brought into harmonious, dynamic balance, States should promote appropriate policies, including population-related policies including linguistic policies, to meet the needs of current and future generations without compromising the ability of future generations to meet their own needs;	<i>including linguistic policies</i>
	107-109	Committed to promoting respect for cultural, linguistic and ethnic diversity and fostering solidarity and reciprocity among peoples, including indigenous peoples and nations and an alliance and partnership among civilizations;	<i>linguistic</i>
	117-119	Recognizing that biodiversity and linguistic diversity are inseparable, connected and interdependent, and alarmed at the increasing loss of linguistic diversity causing loss of traditional knowledge, which is essential for maintaining biodiversity;	Kompleta alineo aldonita laŭ unua amendo de UEA
p.4	128-131	Recognizing the role of volunteerism to achieve sustainable societies by fostering social inclusion and as a means to involve and benefit all segments of society, including women, children, young people, older persons, people with disabilities, indigenous peoples, minorities, migrants, and those excluded and vulnerable due to social, linguistic or economic reasons;	<i>linguistic</i>
p.5	184	GREEN ECONOMY IN THE CONTEXT OF SUSTAINABLE DEVELOPMENT AND POVERTY ERADICATION	--
p.6	216-222	We are convinced that green economies in the context of sustainable development and poverty eradication should be economic systems that foster citizen participation; require social justice and equity and gender equality; protection of ecosystems; creation of economic sufficiency, and that aims for the core idea that green economies enhance sustainable development and prosperity of all nations; ensure the wellbeing of all people; respect the rights, cultures, languages and wisdom of indigenous peoples and local communities; safeguard animal welfare and conserve biodiversity for future generations, while stressing that green economy does not replace sustainable development.	<i>cultures, languages</i>
p.10	381	SUSTAINABLE LIFESTYLES:	--
p.10	388-389	We note that sustainable lifestyles and livelihoods must be built on sustainable consumption and production in our globalizing world and equity among generations, genders, nations, cultures and languages.	<i>cultures and languages</i>

p.11	413	OTHER ISSUES TO BE CONSIDERED AT RIO + 20	--
p.11	414	EDUCATION AND LEARNING FOR SUSTAINABLE DEVELOPMENT:	--
p.11	419-422	We call for the respect and inclusion of ethnic languages in the educational system, as these languages comprise the complexity of their respective environments, and to take into consideration the potential of a neutral international language that combines ease of learning and clarity with neutrality, and therefore can be seen as inherently sustainable;	Kompleta alineo aldonita laŭ amendo de UEA
p.12	464-468	SDG – SUSTAINABLE LIVELIHOODS, YOUTH & EDUCATION: By 2015, nations commit to the principle of sustainable livelihoods as a right for all people and implement monetary, fiscal and language policies to encourage full and decent work. By 2020, biodiversity and ecosystem service considerations are mainstreamed within existing rural development platforms and initiatives to conserve sustainable livelihoods in indigenous and local communities that depend on natural capital for survival.	and language policies
p.15	594-601	SDG - NEW INDICATORS OF PROGRESS: By 2020, nations supplement or replace GDP with a new measure of sustainable economic welfare based on best available information at that time. Economic performance and the forecasted effects of policy changes will be measured by this new metric. We encourage a process of continuous improvement and refinement of the new measure over time and an international process to set standards and make available common methods and data sources. We also encourage the adoption of several other headline indicators of environmental, economic, social, cultural and linguistic sustainability to provide a measure of progress towards the green economy transition, such as civic participation, improved well-being and achievement of sustainable development goals.	cultural and linguistic
p. 15-16	602-606	SDG - ACCESS TO INFORMATION: By 2022, governments will enact and implement Freedom of Information laws giving people the right to obtain accurate and truthful information held by their government, especially on the environment. Governments will actively make available to all stakeholders useful, accurate and truthful well-publicized data and information in appropriate formats and languages, including on the internet. These laws should include whistleblower protection and should extend to information disclosure by corporations.	and languages
